

## Short information ETH Zürich

The Swiss Federal Institute of Technology Zurich (ETH Zurich) is an institution of the Swiss Confederation dedicated to higher learning and research. Together with the ETH Lausanne and four research institutes, it forms the federally directed, and to a major degree financed, ETH domain.

### Commitment

In education, research, and services the ETH Zurich promotes science and scientific activity for their own sakes, as well as for their importance to the near and distant context: The city and canton of Zurich, Switzerland, Europe, the world. The ETH Zurich consciously directs its activities to the needs of human beings, nature and society. It is aware that knowledge and skills must be grounded in a fundamentally open and dynamic attitude if they are to be truly useful in practical life and capable of growth. With its focus on the conservation of the Earth's ecosystem for future generations, the ETH Zurich endeavours to apply its knowledge and skills to its utmost, aware that voluntary economies can also be creative. Solutions to mankind's most urgent problems - poverty, hunger, disease, the threat to our very existence due to the spread of human civilization - demand that we find new approaches to knowledge and skills. It believes that a network of knowledge and skills acquired in an interdisciplinary environment best respond to the natural and cultural interdependencies of life. By integrating the natural sciences, technology, the humanities and social sciences, we can devise innovative concepts of education and research which will allow us to tackle the enormous challenges facing mankind, and help lay a path for a meaningful and sustainable development of present and future civilizations.
